

sitem v1.0

save item environment

Piotr Majkrzak

2011/04/18

`\sitem[]` is the only macro provided by the `sitem` package. It is a save equivalent of standard `\item[]` command, where normally `\texttt`, `\lstinline` and other similar commands wont work. Implementation isn't long, and you can see it bellow:

```
1 \NeedsTeXFormat{LaTeX2e}[1999/12/01]
2 \ProvidesPackage{sitem}
3   [2011/04/18 v1.0 save item environment]
4 \makeatletter
5 \newsavebox{\@sitem}
6 \def\sitem[#1]{\sbox{\@sitem}{#1}\item[\usebox{\@sitem}]}
7 \makeatother
```
